
Civilian pilots are requested to pay special attention to this large Temporary Flight Restriction (FDC 6/5120) encompassing both the Beaver Creek and Broadway fires.

Altitude is restricted from the surface up to and including 13500 feet MSL Even if you don't see a lot of smoke, or very little, that does not mean there are no firefighting aircraft operating. Refer to FAR Part 91.137 for legal statute for TFR avoidance.

Craig Aircraft desk, 970-826-5037, is the point of contact. If flying near the outside boundary of the TFR, a courtesy call to "Beaver Air Attack" on 123.125 would be appreciated. Note that aerial coverage is NOT continuous so, if no answer, broadcast your route "in the blind.".
