Tabert Lake Fire received wetting rain

(Lake Louise, AK) – The 1,360-acre Tabert Lake Fire began to receive wetting rain on Saturday evening. The Type 3 management organization will downsize today and remaining personnel will finish up site assessment work with the Lake Louise Volunteer Fire Department around Little Louise, Louise, Susitna, and Tyone lakes. An additional 70 site assessments were completed on Saturday.

The Temporary Flight Restriction has been cancelled.

Due to wet conditions and decreased fire activity, Inciweb <http://inciweb.nwcg.gov/incident/3644/> will no longer provide new information starting on August 19. The site will remain in place so that photos and information from the past few days are accessible. For future information updates, please call 907-822-5534 or email tabert.lake.fire@gmail.com.
