## Gladiator Fire - AIR QUALITY UPDATE

Smoke from the Crown King Fire is moving toward the Mayer/Dewey area. As long as you can see things that are 10 miles away you can be reasonably sure you won't have a medical emergency caused by smoke inhalation. Conditions are being monitored and communities will be alerted as needed.

For those with heart and or lung disease we recommend that you stay in doors with the windows and doors closed. If you need to drive somewhere keep your car AC on recirculate to keep as much of the smoke out of the car as possible.

The Red Cross Reception Area is located at Mayer Elementary School on Main St. if you need to leave your home to get relief from the smoke.

At night the falling air temperatures tend to cause smoke to move to lower elevations. Communities like Mayer and Dewey might be affected by poor air quality and residents are advised to stay tuned to radios and scanners for alerts. Residents can help their community by checking on neighbors, especially if they live alone, are elderly, or have heart or lung disease.
