Recorded Fire Information: 928-638-7688

BENEFITS OF THE FULLER FIRE FUEL BREAKS

Wednesday, August 3, 2016

Fire: Fuller Fire
Acres: 14,541
Cause: Lightning
Total Personnel: 139

Completion: 48%
Start Date: June 29, 2016
Location: Point Imperial, N. Rim Grand Canyon NP
Fuels/Topography: Timber, grass, rugged terrain

Crews made good progress with the fuel mitigation work along FSR 219 as well as creating fuel breaks off the FSR 610 and FSR 611. This work to implement contingency line will continue, which will create a buffer for fire movement in this densely forested, overgrown area.

Minimal fire activity will continue with the recent rain that the area has received over the last few days. Precipitation is expected throughout the rest of the week with localized flooding possible. Initial Attack crews will be available to mitigate any possible lightning strikes in the area if needed.

We anticipate several road and trail closures to be lifted soon. We will post changes to our Facebook page and Inciweb as soon as we receive notification. Check with the National Park Service at <http://www.nps.gov/grca> and Kaibab National Forest at <http://www.fs.usda.gov/kaibab> for more information.
