September 24, 2020

**Yucaipa, CA-** As a result of progress made on the Eldorado Fire over the past weeks, where multiple agencies banded together as “One Team” to manage the El Dorado Fire under Unified Command. Incident Commanders have determined that a Unified Command structure is no longer required to manage the incident.

Effective at 6:00PM this evening, the incident will transition from Unified Command to Single Command with California Interagency Incident Management Team #13 (Michael Wakoski, Incident Commander) on behalf of the San Bernardino National Forest.

Incident commanders wish to sincerely thank the local communities for their patience, understanding and support as firefighters continue their efforts to fully contain the El Dorado Fire.
