Little Deer Fire

Macdoel, CA-The Little Deer Fire located north of Grass Lake near Little Deer Mountain on the Goosenest Ranger District of the Klamath National Forest has grown to 900 acres. Crews are working to suppress the fire. Forest Service and CAL FIRE crews are finding it difficult to contain the fire, due to extreme fire behavior and frequent spot fires.

The Little Deer Fire is burning very close to Highway 97 and motorists are encouraged to slow down and use caution when driving in the fire area. Although no structures are threatened at this time, the fire is threatening Highway 97, private timberlands and the Union Pacific Railroad.

Many additional fires are burning throughout the area as a result of recent lightning. Additional fire information on the Little Deer and other fires can be found at <http://inciweb.nwcg.gov/>

Forest visitors are urged to be careful with anything that can cause a spark and start a wildfire. Simple actions may prevent costly fires: Shorten towing safety chains to be sure they do not drag on the roadway; check tire pressure, wheel bearings, breaks, and make sure no metal parts are dragging underneath the vehicle. Carry a small fire extinguisher in case an accident starts a fire start. To find out more about what you can do to prevent human caused, unwanted wildfires, please go to www.preventwildfireca.org

Please report all fires or any suspicious activity by calling 9-1-1.
