Subject: Forest Order No. 15-15-08 – Rough Fire Closure

From: Dean Gould, Forest Supervisor 

This document explains my rationale and the regulatory basis for implementing a closure order for the Rough Fire on the Sierra National Forest.

On the afternoon of July 31, 2015 a lightning fire began in the Rough Creek drainage, near the Middle Fork of the Kings River, on the High Sierra Ranger District. By August 13, 2015, the Rough Fire had grown from its original size to over 9,948 acres. As of August 13, 2015 the Rough Fire is 0% contained and has grown to approximately 10,000 acres.

The purpose of this closure is to provide for public safety and facilitate fire suppression efforts. This restriction is necessary for the purposes of ensuring public safety until the wildfire can be managed to protect the public. Closure of the fire area is necessary to help ensure that no one is injured within or near the fire perimeter. All National Forest System roads, within the burned area will be closed due to fire suppression activities that create a hazard to the public which includes the falling of hazard trees that were weakened by the fire and fuel breaks being constructed and maintained along those roads. This closure will remain in effect until the fire is fully suppressed.

I have concluded that this decision may be categorically excluded from documentation in an Environmental Impact Statement (EIS) or Environmental Assessment (EA) under the National Environmental Policy Act. This action falls within the category identified in 36 CFR 220.6(d)(1) – prohibitions to provide short-term resource protection or to protect public health and safety – and does not require documentation in a decision memo, decision notice, or record of decision. I have determined that there are no extraordinary circumstances associated with this temporary closure. Implementation of the decision may begin immediately.
