

Outlook for NW California Fires

Smoke: Transport winds today are forecasted to be northeasterly in the morning then becoming northwesterly in the afternoon. Communities down river of the NW Cal Fires may see air quality degrade to potential moderate/USG (unhealthy for sensitive groups) in the morning and into the day. Happy Camp and Seiad Valley may still see USG/unhealthy conditions in the day time. Intensity of the smoke will continue to depend on the activity of these fires. Regional fires continue to contribute to degraded air quality.

Fire: Orleans:<https://inciweb.nwcg.gov/incident/5430/>
 Clear:<https://inciweb.nwcg.gov/incident/5433/>
 Island:<https://inciweb.nwcg.gov/incident/5304/>

Other: There is a 30% chance of showers and thunderstorms which could create gusty and erratic outflow winds which could increase fire behavior.

Daily AQI Forecast for Aug 07, 2017

Station	Yesterday hourly	Sun 8/06	Forecast Comment for Today -- Mon, Aug 07	Mon 8/07	Tue 8/08
Yreka			Overall moderate during the day with potential for good overnight		
Fort Jones			Overall moderate conditions		
Etna			Overall moderate conditions		
Callahan			Overall moderate conditions with potential for USG in the afternoon		
Seiad Vly			Overall USG with potential unhealthy in the afternoon		
Sawyers Bar			Overall moderate conditions with potential for USG in the afternoon		
Weitchpec			Overall moderate conditions with potential USG in the morning into the afternoon		
Orleans	No hourly data		Overall moderate conditions with potential USG in the morning into the afternoon		
Happy Camp			Overall Unhealthy conditions with potential for moderate in the morning		
Hoopa			Overall moderate conditions with potential USG in the morning into the afternoon		
Willow Creek			Overall moderate conditions with potential USG in the morning into the afternoon		

Issued Aug 07, 2017 by Ariane Sarzotti, Air Resource Advisor

Air Quality Index (AQI)	Actions to Protect Yourself
Good	None
Moderate	Unusually sensitive individuals should consider limiting prolonged or heavy exertion.
USG	People within Sensitive Groups* should reduce prolonged or heavy outdoor exertion.
Unhealthy	People within Sensitive Groups* should avoid all physical outdoor activity.
Very Unhealthy	Everyone should avoid prolonged or heavy exertion.
Hazardous	Everyone should avoid any outdoor activity.

Disclaimer: Forecasts may be wrong; use at own risk. Use caution as conditions can change quickly. See your health professional as needed. Smoke sensitive groups should take appropriate precautions.
