Fire Information Phone: (707) 356-9442 (Hours: 8am-8pm)

INCIDENT INFORMATION

Unified Command: Six Rivers National Forest, CAL FIRE, California Highway Patrol, Trinity County Sheriff and Humboldt County Sheriff.

CURRENT CONDITIONS

The Lightning Complex Fire is currently 13,968 acres with 0% containment. There are 1,400 personnel assigned to the incident. USFS, CIIMT 11 and CAL FIRE continue to work together in order to create a single unified operational plan for firefighters to collectively fight fire and support the communities impacted.

Overnight in the area west of the Bremer Fire burning within the Lightning Complex, firefighters performed firing operations off dozer and handlines to remove fuels to protect homes. Crews will continue to monitor and patrol the fire to look for threats to control lines. If the visibility permits, aviation crews will assist ground firefighters with water drops.

On the northwest side of the Waterman Fire burning within the Lightning Complex, crews had a successful firing operation near the Four Road which held overnight without any challenges. To the north of this fire, resources were able to improve the dozer and handlines towards Horse Linto Creek and will continue to work in this area today. There was another firing operation on the far southeast side which was successful in removing fuels. Fire crews will continue to work in this area. Firefighters will be concentrating on securing the communities near Salyer Loop and Salyer Heights.

On the Campbell Fire burning within the Lightning Complex, resources continue to prep Waterman Road/The Four Road and make a turn towards Zigler Point and toward the community of Trinity. Crews did firing operations in this area that held well without challenges. To the southeastern edge of this fire, dozers put in line above Trinity Village. There were some challenges with spot fires, however fire crews were able to get these spots
and bring them back into the main body of the fire. Nightshift crews were able to improve the lines that were made around spot fires and feel confident about those holding up.

On the west side of the Ammon Fire burning within the Lightning Complex, crews are scouting routes for dozer line that will be put in today. In the southeast corner, prep work continues with no current challenges to the line. Along Ammon Ridge prep work was completed yesterday and firefighters will continue to improve the line without any expected challenges in this area.

To the west side of this fire along Friday Ridge Road progress is slow as there are very thick fuels in this area. Dozer and handlines have been started on the northwest side of this fire and firefighters will continue to work in this area to connect to dozer line that has been put in from the northeast.

Overnight humidity recovery was moderate with values from 40-60% which was much drier than previous nights. Gradual warming and drying in the coming days means the fuels will be more susceptible to burning. The fire will be more active as the inversion lifts. Air operations will be limited due to poor visibility from the inversion layer. This will impact northern areas of the Lightning Complex.

Strategic objectives are to keep the fire north of Ammon Ridge Road, south of Lone Pine Ridge Road, east of the FS-1 road and west of the boundary with the Shasta-Trinity National Forest.

** EVACUATIONS **

** NEW ORDER ISSUED FOR HUM-E032-B, northeast of Willow Creek. Zone description: HUM-E032-B north of Forest Route 7n02. South of Horse Linto Creek Road. East of Horse Linto Creek Road. West of Forest Route 7n10.

The fire threatens communities along the Trinity River. Five main fires burn North and South of Highway 299. Primary areas of focus are the communities along the 299 corridor, Waterman Ridge, Friday Ridge Road, and Ammon Ridge. Evacuations continue around Willow Creek, Friday Ridge, Salyer and Trinity Village. Additional fire growth could impact communities and residences along the Route 1 road.

If you are under an evacuation warning, take the necessary steps to be ready to leave.

** EVACUATION CENTER **
ANIMAL EVACUATION CENTER

Hoopa Rodeo Grounds
1767 Pine Creek Rd., Hoopa, CA 95546
Phone: (707) 492-2851
** The Hoopa Rodeo Grounds has several single pens and larger pens for whole herds. Call directly if you need directions or help transporting your large animals. They cannot house sheep, goats, poultry, or small animals, but they can potentially help arrange for temporary foster placement. If you can foster, please reach out regarding your availability and capacity.

ROAD CLOSURES

State Route 299, State Route 96, and Route 1 remain open to through traffic. Residents are encouraged to visit [http://quickmap.dot.ca.gov/](http://quickmap.dot.ca.gov/) to check for state highway closures. The following roads into evacuation zones have been closed. Residents may still use these roads to travel out of evacuation order zones:

- Horse Linto Creek Road at Saddle Lane
- Country Club Road at Kimtu Bridge
- Friday Ridge Road at Hwy 299

SMOKE

Heavy smoke and strong inversions continue to affect the health of those who are not yet evacuated.
Please check [https://www.ncuaqmd.org](https://www.ncuaqmd.org) for air quality resources.
