

Waldo Canyon Fire Burned Area Emergency Response (BAER) Implementation Update

Contact: Cathleen Thompson, BAER Information Officer (707-853-4243)

BAER EMERGENCY STABILIZATION TREATMENTS CONTINUE ON WALDO CANYON FIRE

Colorado Springs, CO (September 7, 2012) – The Waldo Canyon Burned Area Emergency Response (BAER) team continues to implement emergency stabilization treatments.

The BAER implementation team is working with contractor Bradco Environmental to aerially treat 3,038 acres with AgStraw and Woodshred mulch with helicopters. To-date, 722 acres have been completed and 1,191 acres are currently being treated. The BAER team expects the remaining acres to be completed by September 18, weather permitting.

Additional BAER stabilization treatments that have been completed are:

- Installed 50 “Flash Flood” warning signs along Forest Service trails and recreation areas.
- Installed a gate on the westside of Rampart Range Road for continued closure access to the burn area.
- Continued burn area closure for safety and protection measures.
- Removed hazard trees along the trails and within the recreation sites, stabilized 8 miles of trails, and removed hazardous debris on national forest system lands within the fire perimeter area.

BAER treatments that the Forest Service is planning to complete:

- Storm-proof 16 miles of Forest Service roads within the burn area, starting on October 1.
- Implement invasive weed detection surveys and apply an herbicide treatment, starting on September 15.

BAER treatments that are in progress:

- Some roadside hazard tree removal.

- Gate installation on the eastside of Rampart Range Road (above Garden of the Gods area).
- Storm patrol along Forest Service Roads within the burn area, after rain events.

The Pike National Forest reminds the public that all trails and the entire fire perimeter continue to be closed to the public for its safety and the recovery of the natural resources.

The BAER implementation team coordinated their emergency stabilization treatments with the Natural Resources Conservation Service (NRCS), Colorado Department of Transportation, El Paso County, and the City of Colorado Springs along with other state and local agencies responsible for flood control and assistance to landowners downstream of burned area federal lands (http://www.co.nrcs.usda.gov/news/pas/2012_Fires/2012_Fires.html).

NRCS is also working cooperatively with the El Paso County Department of Public Works (DPW) and cities and communities adjacent to and downstream from the Waldo Canyon Fire burned area to evaluate potential threats to specific businesses, homes, and neighborhoods.

Federal assistance to private landowners is the primary responsibility of the NRCS through the Emergency Watershed Protection (EWP) program (http://www.co.nrcs.usda.gov/news/pas/2012_Fires/2012_Fires_EWP_Assistance.html).
