

All fireline personnel including contractors are required to complete fire shelter training. Heavy equipment operators Daniel Hahn and Calvin McRoy of Granby Colorado (above left and right side of photo), work with Beaver Creek Fire Safety Officer Chris Church (center) to learn proper fire shelter use. Hahn and McRoy operate a 32-ton “feller buncher,” capable of cutting down trees 22” wide. Their first assignment will be clearing a fuel break on the fire’s east flank.
