There may be hazards associated with traveling adjacent to and entering into burned areas. Forest visitors must be prepared to stay longer than expected due to changing circumstances. Weather conditions such as precipitation and wind can rapidly change conditions on the ground. Wind can blow trees across roadways and trails and precipitation can wash debris across roadways and trails blocking access. Forest visitors must be prepared to stay longer than expected due to changing circumstances. Preparation for the unexpected is the best plan a Forest visitor can have. Items to consider include:

- ✓ Adequate food, water, clothing, sleeping bags, and other provisions needed in case of inclement weather and extended stay is necessary in the area of travel.
- ✓ Chainsaw and fuel if traveling outside of a designated wilderness, handsaw, and shovel, in case trees or other debris blocks road or trail access.
- ✓ Forest visitors should inform someone they know about where they are going and when they plan to be back in case an emergency situation arises.
- ✓ Communications that will work in the area they plan to travel (cell phone, satellite phone, or satellite emergency notification device).
