

Outreach Efforts to Castle Rock Fire Hispanic Communities a Success!

Bi-lingual fire information officers, Wood River Fire and Rescue, and community volunteers visited the Hispanic communities near the fire perimeter with fire maps and updates in Spanish. Residents greatly appreciated the visits and the information they received. They had many questions about the fire, equipment, crews, and evacuations. They were also genuinely concerned about the safety of the firefighters. Children became familiar with the fire maps and were encouraged to talk about the fire status to their families and neighbors.
