

# FACT SHEET

## Condon Mountain Fire

Swan Lake Ranger District

September 27, 2012 8:15 a.m.

Information Officers: Katie Knotek, Colter Pence & Ted Pettis  
Fire Information Line: (406) 754-0127 w/answering machine  
Office hours: 8:00 a.m. to 8:00 p.m.

**New Email: [condonmountainfire@gmail.com](mailto:condonmountainfire@gmail.com)**

**Incident:** The Condon Mountain Fire was started by lightning on 7/28.

**Location:** Approximately 4 miles northeast of Condon, MT.

**Agency Jurisdiction:** USFS, Flathead National Forest; Montana DNRC, Swan River State Forest

**Cooperating Agencies:** Swan Valley Rural Fire Dept., Lake County Sheriff's Office, Missoula County Sheriff's Office, Missoula County OES, Lake County OES, Swan Ecosystem Center

**Incident Commander:** Shawn Pearson, Northern Rockies Type II Incident Management Team (IMT). The Incident Command Post (ICP) is located at the Condon Work Center.

**Current Size:** 5,000 acres

**Containment:** 40%

**Structures Threatened:** 12

**Status:** The fire is burning in heavy timber with numerous, standing snags. The area consists of steep, hazardous terrain with high potential for rollout and spotting. The fire is located just west of the Bob Marshall Wilderness and is visible from Highway 83. There are structures in the Swan Valley within 1½ miles of the current fire perimeter. All residents east of Highway 83 in the Condon area are under a "Ready" Stage 1 Alert for the *potential* of a future evacuation.

**However, there are no evacuations in effect at this time.**

**Yesterday's Activities:** Crews used aerial and hand lighting to successfully bring fire further downhill between Condon and Smith Creeks to help with containment efforts. A small group also worked through the night continuing the burnout operation. Construction of the mechanical fuel break on the southwest flank has been advanced from Rumble Creek toward Road 905. The structures nearest to the fire between McKay and Cooney Creeks have had the necessary fuel treatments and sprinklers set up. Engine crews tested all systems and made improvements. Helicopters were used for water bucket drops to cool hotspots.

**Current Resources:** **Five** 20-person crews, **seven** engines, **seven** pieces of heavy equipment, **two** water tenders, and **four** helicopters. Total personnel: **221**.

**Today's Activities:** A warm, drying trend will bring higher temperatures in the 80's and relative humidities near 20% with northwest winds 5-10 mph. If weather conditions permit, crews will complete needed burnout operations down to the fuel break along Roads 9813 and 9762 between Condon and Smith Creeks. Aerial resources with water bucket drops will be available for direct attack on any hotspots along and within the fire perimeter. **A Community Meeting will be held TODAY @ 6pm at the Swan Valley Community Hall.**

**Restrictions/Closures:** There is an Area Closure around the fire for public safety, which includes closure of Trail #29 (Smith-Little Salmon), Trail #192 (East Foothill) and the Cooney Lookout. Trails #415 and #42 remain open. A temporary flight restriction (TFR) is in effect surrounding the Condon Mountain Fire area and the Condon Airstrip is closed to all non-fire aircraft until further notice.
