Cause: Under investigation
Structures Lost: 2

This update will be the last evening update. Morning updates will continue to be published.

Today's actions: Fire behavior today was very active due to the higher temperatures and lower relative humidity. Afternoon winds produced spotting up to six tenths of a mile outside fire lines. All spots were contained using helicopter support. Many green islands of vegetation within the fire perimeter were burning by late afternoon. A burnout operation on the cliff-face behind Rising Sun Campground continues this evening.

The Going-to-the-Sun Road remains closed from the St. Mary Campground to Logan Pass on the east side of the park. At this time the road would be hazardous for public to travel through the burn area. The fire is still burning in close proximity to the road. Unburned trees near the road still remain and have the potential to burn. Additional snags were identified adjacent to the road that will need to be removed. This road provides the only access to the fire area. Firefighters need unrestricted access in the event of a fire or medical emergency.

Closures: The Rising Sun Motor Inn and the Rising Sun Campground remain closed. The Going-to-the-Sun Road remains closed from the St. Mary Campground to Logan Pass on the east side of the park.

Openings: Going-to-the-Sun Road is open to Logan Pass from the west side of the park. Visitors should continue to expect delays and congestion along the road. The Red Eagle drainage is open for hiking access to Red Eagle Lake, Triple Divide and the beaver ponds. The Sperry Trail is open from Lake McDonald Lodge to Gunsight Pass. Any travel beyond Gunsight Pass is closed due to fire activity. The Lake Ellen Wilson backcountry site is open.

Glacier National Park remains open, and excellent recreation opportunities abound. Information on current park activities can be found at: www.nps.gov/glac, [Facebook.com/GlacierNPS](https://www.facebook.com/GlacierNPS), twitter.com/glaciernps, or [flickr.com/photos/glaciernps](https://www.flickr.com/photos/glaciernps). Additionally, current conditions can be viewed on park webcams at: <http://www.nps.gov/glac/learn/photosmultimedia/webcams.htm>.
