

Thompson-Divide Complex

Northern Rockies Type II Incident Management Team
Irv Leach Incident Commander

Daily Fact Sheet Sept. 1, 7:00 p.m.

Fire Information: (406) 387-4854/ (406) 314-1669, 8 a.m. - 8 p.m.

Fire Complex Completed: 32%

Resources - Total Personnel: 298

Injuries: 1

Structures Lost: None

20-Person Hand Crews: 2 Type-1 and 3 Type-2, 1 Wildland Fire Management Module (8), 1 Helitack Crew (10)

Air Support: Helicopters (2 Type-1 & 2 Type-3), **Engines:** 11 **Heavy Equipment:** 9

Cause of Fires: All three active fires have been determined to be lightning caused.

The Thompson-Divide Complex is comprised of the Sheep and Granite Fires on the Flathead National Forest and the Thompson Fire in Glacier National Park. The Sheep fire is the incident priority due to its proximity to US Hwy. 2, BNSF railway and the community of Essex. Crews and heavy equipment have started to demobilize off the incident as of today.

Essex and the surrounding area have been placed back in the 'Set' Stage of the Ready, Set, Go evacuation model. Residents are advised to remain prepared to evacuate if conditions again warrant this action. For more information on the evacuation, call the Flathead County Office of Emergency Services at (406) 758-2111.

On Aug, 31, U.S. Highway 2 reopened with pilot cars escorting traffic between mileposts 176.5 at Schellinger Gravel Pit and 185 at Bear Creek. Escorted vehicles are not allowed to stop in this area. BNSF and Amtrak trains are running normally. Call 511 or visit <http://www.mdt.mt.gov/travinfo/alerts.shtml> for current road status. For more information on Amtrak call (800) 872-7245.

Stage II Fire Restrictions are in effect for northwestern Montana.

Visit <http://svc.mt.gov/deq/todaysair/> for air quality info.

Closures are in effect for some trails and areas in the vicinity of the fires for Glacier National Park and Flathead National Forest. For more info, see the Glacier NP page <http://www.nps.gov/glac> or for Flathead NF call Hungry Horse Ranger District (406) 387-3800 or go to <http://inciweb.nwccg.gov/incident/article/4468/28364/>.

Low pressure weather patterns will continue to affect the fire complex area thru the weekend. Tomorrow, temperatures will range in the 60s with humidity in the 30-40% range. Afternoon showers and gusty conditions are likely. Continued minimal fire activity through the weekend is expected, giving firefighters opportunities for building fireline.

Sheep Fire, Flathead National Forest

Link to <http://inciweb.nwccg.gov/incident/4468/>

Structures At Risk: 200+ structures, BNSF has several wooden snowsheds and 1 trestle, utilities infrastructure

Approximate Size: 2,102 acres **Structures Lost:** None

Fire Update: The Sheep Fire is on the Flathead National Forest and burning in very steep terrain with limited access. The fire is about 1 mile south of Essex and about 1/8 mile from the train tracks between Tank Creek and McDonald Creek. The fire showed little activity again today. Firefighters continued to build fireline and put out hotspots in the Sheep Creek and Tank Creek drainages. The shaded fuelbreaks designed to create defensible space in the Essex area are completed. The logs and slash created by this effort are being moved to a safe location. Structural protection measures are in place in Essex. A night shift will continue to monitor fire movement and patrol the Essex area for any encroaching fire activity.

-more-

Granite Fire, Flathead National Forest

Link to <http://inciweb.nwcg.gov/incident/4468/>

Approximate Size: 840 acres

Fire Update: The Granite Fire is located west of Marias Pass and south of Hwy. 2. The fire started in the Great Bear Wilderness and has moved north out of the Wilderness. There has been little fire activity the past few days. Two engines and crews are using existing roads to monitor the fire's progress.

Thompson Fire, Glacier National Park

Link to <http://inciweb.nwcg.gov/incident/4468/>

Approximate Size: 17,857 acres

Structures At Risk: 2 historic cabins

Structures Lost: None

Fire Update: The Thompson Fire is located in remote south-central backcountry of Glacier National Park about 15 miles east of the West Glacier entrance in the Thompson and Nyack drainages west of the Continental Divide. A small crew was inserted back into the fire area today to start removal of hoses and pumps. Aircraft will continue to monitor from the air for any increased fire activity. The fire investigator was able to fly into the fire area yesterday and determined the fire was lightning caused.

Most of Glacier National Park is unaffected by this wildfire complex and is available for recreational use. The trail over Triple Divide Pass between the Cutbank campground and the Red Eagle Lake campground, including the Medicine Grizzly Lake Trail spur, as well as the Cut Bank drive-in campground and the Atlantic backcountry campground have reopened. Other limited backcountry closures remain in effect for visitor safety. Please visit <http://www.nps.gov/glac/planyourvisit/hikingthetrails.htm> for current information.

The Thompson Fire has not impacted park roads. The Going-to-the-Sun Road is open.

For information on the Reynolds Creek fire, please visit <http://inciweb.nwcg.gov/incident/4405/#>
