

Smoke Outlook for 7/27 - 7/28
Crater Lake Area Timber Crater 6 Fire
 Issued at: 2018-07-27 15:39 UTC

Outlook for Crater Lake Area

Special Statement

Numerous fires are contributing to poor air quality in the area. Avoid exposure when possible by limiting outdoor activities. Consider relocating to cleaner air if possible.

Fire

Fire behavior is likely to decrease in comparison to yesterday, with minimal growth on the Timber Crater 6 Fire. Other fires in the area are expected to exhibit moderate to active fire behavior. If wind speeds increase, the potential for significant fire growth is probable.

Smoke

Drift smoke from multiple fires nearby continues to impact the Crater Lake area. Light smoke from the Timber Crater 6 fire is likely to disperse East and South toward Klamath Falls. Air quality is expected to be best from around 11:00 am to 3:00 pm with the worst conditions in the early evening then subsiding after 8 pm.
