

## Outlook for Chetco Bar Fire & Miller Complex

**Smoke:** Smoke remains absent in most of the communities and surrounding areas, however isolated areas on the fire continue to produce small amounts of smoke. As fuels dry out and conditions become more favorable for burning the chances of seeing more smoke in the environment is likely. Any smoke produced should be light and disperse well as it moves with the wind.

**Fire:** Fire containment and suppression actions continue to be successful. The warmer and drier weather pattern will help firefighters identify areas that may still be burning under heavy canopy and brush.

**Other:** As suppression and repair activities continue firefighters are constantly moving around the fire on various roads. Expect heavy traffic when driving near wildfire areas and on narrow mountain roads.

## Daily AQI Forecast for Sep 23, 2017

Station	Yesterday hourly	Fri 9/22	Forecast Comment for Today -- Sat, Sep 23	Sat 9/23	Sun 9/24
Agness	6a noon 6p	●	No smoke impacts are expected in the area.	●	●
Gold Beach	No hourly data	●	No smoke impacts are expected in the area.	●	●
Brookings	No hourly data	●	No smoke impacts are expected in the area.	●	●
Smith River		●	No smoke impacts are expected in the area.	●	●
Cave Jct		●	No smoke impacts are expected in the area.	●	●
