

Air Quality Forecast-NE Washington Regional Fires-Friday September 11, 2015
 Prepared by Mark Fitch (mfitch@nps.gov) and Karen Dillman (kdillman@fs.fed.us) Air Resource Advisors

Smoke Summary: Friday and Saturday forecast is for high pressure to continue to dominate over NE Washington. Light variable surface winds and low mixing heights may provide the conditions for dense smoke accumulation in low lying valleys, roads and communities near the fires, mainly in the evenings. Moderate to good in most areas during the day.

Extended Outlook: Warmer temperatures and drier conditions are expected to continue until early next week when a strong cold front arrives. Moderate instability may increase fire activity and smoke.

Monitoring stations for Tonasket and Republic have been shut down due to machine malfunction as of 09/10/2015

Site	Air Quality			Comments
	September 10 THURSDAY	September 11 FRIDAY	September 12 SATURDAY	
Spokane Metro	Good	Good	Good	Favorable air quality conditions will persist.
Davenport	Good	Good	Good	
Colville	Good	Good	Good	
Kettle Falls	Good	Good	Good	
Wellpinit	Good	Good	Good	
Inchelium	Good	Good	Good	
Orient	Moderate	Good	Good	
Omak	Moderate	Moderate	Moderate	Early morning hours may be in the unhealthy range but expect good to moderate depending on local winds. Light winds will suppress smoke transport. Expect local valleys to contain dense smoke conditions but clearing during the day.
Nespelem	Moderate	USG	USG	
Republic	NA	Moderate	Moderate	
Tonasket	NA	Moderate	Good	

Disclaimer: Conditions may change quickly. These predictions are based on anticipated weather and fire activity. The air quality outlook is based on data from automated instruments that have not been subjected to a quality assurance review. AQI's estimated for sites with air monitors.
