

FIRE, WEATHER AND SMOKE SYNOPSIS

Weather: Gusty winds expected by mid-afternoon. Warming and drying trend will continue through the week.

Fire Activity: Fire behavior is expected to increase through the coming week but no significant fire growth or activity is expected today. Fuels remain critically dry.

Smoke Summary: While larger fuels such as dead and downed trees continue to smolder, smoke will not be a significant factor in today's air quality throughout the area.

NOTE: Breathing smoke is not healthy for anyone, but some people are at greater risk, including those with heart or lung disease, children, and the elderly. If it looks smoky, you may want to limit or eliminate exercise or other outdoor activities. A daily air quality summary report and links to real-time monitoring data and information about ways to limit your exposure to protect your health are available below.

Air Quality Outlook (smoke related)

Sites with air quality monitors (based on Air Quality Index for each 24-hr day)

Site	Yesterday	Today	Tomorrow	Smoke Notes
Duck Creek	Good	Good	Good	Enjoy the clear air today!
